#### **Step 1: Check Your System Requirements**

Before you begin, ensure that your computer meets the minimum system requirements for Windows 10. This includes sufficient disk space, memory, and a compatible processor.

#### Step 2: Create a Backup of Your Data

It's crucial to back up your important files before proceeding with the installation. This ensures that your data is safe in case anything goes wrong during the installation process.

#### Step 3: Download the Media Creation Tool

To download Windows 10, you'll need to use the Media Creation Tool, which you can obtain from the official <u>Microsoft website</u>. This tool simplifies the process of downloading the ISO file and creating installation media.

Download the Media Creation Tool	
Privacy	
Create Windows 10 installation media         To get started, you will first need to have a licence to install Windows 10. You can then download and run the media creation tool. For more information on how to use the tool, see the instructions below.         Download tool now	
<ul> <li>Using the tool to upgrade this PC to Windows 10 (click to show more or less information)</li> <li>Using the tool to create installation media (USB flash drive, DVD, or ISO file) to install Windows 10 on a different PC (click to show more or less information)</li> </ul>

#### Step 4: Run the Media Creation Tool

Once the Media Creation Tool is downloaded, run it on your computer. You'll be prompted to either upgrade the current PC or create installation media for another PC. Select the latter option if you're creating a bootable USB or DVD.

#### Step 5: Choose the Installation Media

Next, choose whether you want to create a bootable USB flash drive, burn a DVD, or download the ISO file directly. For most users, a USB flash drive is the most convenient option.
